# MANAGED COMPLIANT CLOUD – HELPING BUSINESSES KEEP INFORMATION SECURE

We are a managed cloud services provider focusing on the needs of specialized businesses, especially those in the highly regulated industries of Finance and Healthcare. All our clients, regardless of their type of business, depend on us to provide the technological solutions best suited to their needs – from data security, to work-flow enhancement, compliance, and much more.
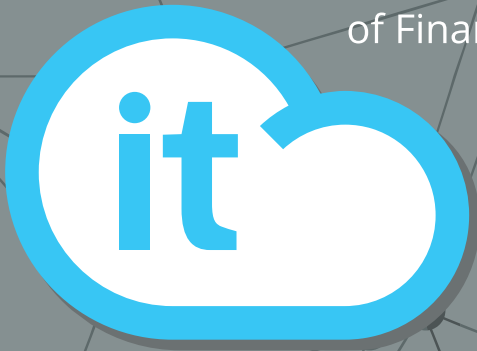

Elevating the Cloud with our added Compliance and Security Expertise to Fuel Your Success

Today, the only thing that changes more rapidly than your business is technology, a fact we use to your advantage. Our primary mission has always been to work closely with our clients to discover their particular needs, and to provide just the right solution to help them meet their goals.

> *What we discovered was, the more specific our clients' challenges, the better able we became to provide solutions to those challenges, leading us to become the premier provider that enables the process of compliance and extends our clients' ability to measure, monitor, report, and improve that compliance process.*

What Businesses Trust

Over a number of years, we have seen our clients' needs, just like our own business, grow and evolve. While we began simply as a company for IT assistance, we quickly adapted to meet requests for network management, customized application development, virtualization projects, and compliant cloud computing. We have leveraged our individual services capabilities and expertise to provide today's comprehensive solutions for your specialized needs. Perhaps the reason we can so accurately predict "what's next," is because of the significant role we've had in creating "what's now."

Throughout the years, we have also changed how we do business. We have turned our knowledge, skills, and talent inward, to create our own solutions, while leveraging best-in-class selective products in the marketplace. In this way we can more specifically address your needs, improve quality control, and take advantage of our great company-wide expertise. Again, it's our clients who have led us to this reality and it is a desire for their success that inspires us.

Putting the Cloud to Work for You

Our years of experience with individual cloud solutions have helped us to provide something much greater. Today, we are able to work with our clients to discover and anticipate their business needs. Nowhere is this truer than in the area of industry regulations and compliance. To offer greater peace of mind, we've made certain that all of our solutions rely on products and services that are compliant with the appropriate industry regulations, such as HIPAA, PCI, and FFIEC. Together we are able to address your organization's issues, challenges, and goals using comprehensive technology-based solutions to make your business operate more securely, efficiently, and effectively.
